

Amendments to the Claims:

The following Listing of Claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Currently Amended) An optical filter comprising:
a multilayer optical film having a surface; and
an adhesive layer including adhesive disposed on the surface of the multilayer optical film ~~containing an adhesive~~ for adhering said optical film to another surface ~~an adherent surface on the surface of said optical film or inside said optical film~~, wherein said adhesive is an olefin polymer selected from the group consisting of atactic polypropylene, a polymer polymerized from a monomer having 4 to 16 carbon atoms, a copolymer of atactic polypropylene and a vinyl monomer, and a block copolymer of styrene and an olefin;
and wherein the optical filter has a peeling property from the ~~adherent~~ other surface.
2. (Original) The optical filter according to claim 1, wherein an adhesive layer formed from said adhesive has a peeling strength of 0.2 to 5 N/25 mm when measured against a surface of a polyethylene terephthalate (PET) at a peeling rate of 90 inch/min. (about 229 cm/min.) at a peeling angle of 180 degrees.
3. (Original) The optical filter according to claim 1, wherein said optical film comprises a louver film.
4. (Withdrawn)
5. (Withdrawn)
